

Muhammad Umar

Data Scientist & AI/ML Engineer (in training)

Karachi, Pakistan · muhammadumarjamali0@gmail.com · github.com/umarali8 · linkedin.com/in/muhammad-umar-490605223

PROFILE

BS Computer Science student focused on Data Science, Machine Learning, and AI Engineering. Experienced in taking a problem, understanding the data behind it, and turning it into a practical, evaluated solution using Python and machine learning — with a habit of being clear about what's proven versus what's still pending.

PROJECTS

Content Refresh Prioritization — FlyRank AI/ML Internship capstone

- Built an end-to-end ML pipeline to prioritize content for refresh, comparing a Decision Tree model (87.17% test accuracy) against a rule-based baseline (87.93%), and identified impressions_90d as the dominant predictive signal (~82% feature importance).

Taking the Model Public — inspectable research paper

- Published the page-priority model as a public, inspectable research paper covering the question, data, baseline, model, leakage checks, and open items; deployed it live and incorporated a real design review, fixing a broken reproducibility link and a mobile nav bug.

The Refresh Loop — AI Fluency capstone

- Connected model, paper, and writing voice into one repeatable workflow, including a documented AI process with human sign-off points and a Case Study Intake Agent (a scoped Claude Project) that drafts case studies and flags overstated claims.

SKILLS

Python, Machine Learning, Exploratory Data Analysis, Scikit-learn, Pandas & Matplotlib, SQL, Power BI, Deep Learning, Generative AI

CERTIFICATIONS

- Introduction to Software Engineering
- Creating Compelling Reports
- Getting Started with Git and GitHub
- MongoDB Overview: Core Concepts and Architecture

EDUCATION

BS Computer Science — Sir Syed University of Engineering & Technology (SSUET)

Oct 2024 – Oct 2028 (expected)

Intermediate — Government Boys Higher Secondary School, Mehar Ali Jamali

AVAILABILITY

Open to internships and entry-level Data Science / AI/ML roles.
